

Flash API library for TMS320F2807x devices

1. Flash API library to be used: F021_API_F2837xD_FPU32.lib (v1.54) or F021_API_F2837xD.lib (v1.54)
2. Flash API library is provided at: C2000Ware_x_xx_xx_xx\libraries\flash_api\f2807x
3. Flash API reference guide to be used: <http://www.ti.com/lit/ug/spnu629/spnu629.pdf> .

Note that the sample implementations (examples) provided in the above API reference guide use 200MHz CPUCLK frequency since that document is primarily made for TMS320F2837xD devices. TMS320F2807x users should not use more than 120MHz of CPUCLK as mentioned in the data manual.
